Art Unit: 1621

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-8, drawn to sulfonylimines, classified in class 564, subclass 82+.

II. Claims 1 and 2-8, drawn to sulfonylmethanes, classified in class 568, subclass 34+.

The inventions are distinct, each from the other because of the following reasons:

The compounds of groups I and II are structurally diverse so that a reference anticipating a compounds in one group would not necessarily render compounds in the other group obvious.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicants are further required to elect a single disclosed species, *i.e. a single disclosed compound*, for examination purposes.

A telephone call was made to Mr. Dahl on 17 September 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter G O'Sullivan whose telephone number is (571)272-0642. The examiner can normally be reached on M-F 8-5:30.
